

TRS Series

Static Torque Sensor

Used either in torque display systems or in torque closed loop control systems, Merobel TRS series offer a plug-and-play solution for test rigs.

When embedded in a closed loop system it easily allows to dramatically increase the dynamic properties of a torque simulation device, and to build more accurate and stable regulation systems.

Benefits

- ▶ Very large bore diameter
- ▶ 2 meters shielded cable output
- ▶ High torque measurement accuracy
- ▶ Designed for a long lifetime
- ▶ Fully designed for fitting on MEROBEL brakes.

Specifications

Overload related to nominal	150%
Supply	5V to 10V
Operating temperature	0° to 80°
Maximum working temperature	-10/+100°
Accuracy	± 0.5%
Strain gage resistance	~ 700Ω

Reference	Nominal Torque [Nm]	Part N#
TRS 50	50	ME332450-00
TRS 100	100	ME332451-00
TRS 200	200	ME332452-00
